

Happy 50th Birthday

You've been in this world for 50 years
You have faced all the happiness and tears
And there's one thing we want you to know
We want you around for 50 more
You've been in this world for 50 years

You've been livin' it up a half a century
You must be proud, great friends and family
Look at all that you have done
And you're not even fifty-one
You've been livin' it up a half a century

Life begins at forty so we're told
If the truth is known that news is really old
As your golden years begin, you're still our special friend
Looking and feeling good down to your soul

Way back then when you were young and still naïve
Getting older was something you just could not conceive
But as the years began to slip away
And your hair kinda turned a little gray
Gradually you're starting to believe

You've been out there chillin' for 50 years
You have faced all the happiness and tears
And there's one thing we want you to know
We want you around for 50 more
You've been out here chillin' for 50 years

May the good years keep on coming and never stop
You've always been the cream of the crop
So just stay the way you are and forever you'll be a star
You're not over the hill, just getting to the top

Happy birthday to you 50 years
You have faced all the happiness and tears
And there's one thing we want you to know
We want you around for 50 more
Happy birthday to you 50 years
